Product

MVP released

Multy is a new generation cryptocurrency wallet which turns payments into pure pleasure with the help of:

1. Air payments without requesting Internet connection, sharing geo-location, any personal data;
2. Contact list with wallet numbers of all those whom you have made transactions to;
3. Currency converter letting you set the transaction's amount and see balance in fiat;
4. Multisignature for joint capital control;
5. Highest security level: Multy doesn't store any personal information;
6. Simplicity: setting up a wallet takes only two taps with only one seed phrase for all crypto-assets;
7. Privacy: all private keys are encrypted on the owner's phone;
8. A browser for decentralized applications implemented within our mobile application.

Investments

Pre-seed - 40 BTC from Cyber Fund in November, 2017

Geographic Focus:

The USA, Europe, Canada; less on post-Soviet region.

Problem

Of cryptocurrency users: evident lack of secure, convenient and multi-functional wallets protecting users personal data and providing the best experience transferring assets.

Of vendors: complicated and expensive access to cryptocurrency users.

Solution

Multy is a mobile cryptocurrency wallet that solves the problem of users' data and assets safety while providing a user-friendly and intuitive interface and experience for the community.

We care about security, so if anyone tampers with your device, we delete all sensitive data permanently.

Business Model

Monetization hypotheses of the application:

- In-wallet exchange commissions;
- Multisignature setups;
- Donations from the wallet's users;
- DApps partnerships and integrations;
- Partnership programs with other market players.

Market

The market is young but a fast-growing one with the number of blockchain wallets users reaching 29 mln today.

This is a globally scalable market. The USA, Northern Europe, Asia, and post-Soviet area are of our primary interest.
